

EPIPHANY SCHOOL OF CHARLOTTE | IMPACT STORY

“I know with 100% certainty this school has changed their lives for the better.”

When asked about our experience with The Epiphany School of Charlotte I have a very simple answer: fantastic! When you have a child that doesn't have a simple diagnosis or fit into a neurotypical box you find yourself following many paths to try and find answers. Each of our paths led us to Epiphany.

When visiting, I immediately saw each of my three children there – it was so much more than a program or a building. The people are experienced and genuine, and their consistent, unified approach is delivered with care and concern for each student.

Our children have learned invaluable interpersonal skills and will interact with others throughout their lives with empathy and understanding, thanks to the skills learned at Epiphany.

We didn't expect Epiphany to “solve” our children's' challenges, but we watched our daughter go from barely able to make it through the school day without a meltdown to graduating; our son move from frequent internal retreats avoiding the stress of school, to now being the first one ready to head out the door, and with a smile on his face! Our other son finally found a place that allowed him to feel like he was with other people who just “got it.” Without a doubt, the impact of this school is life changing for each of them.

We each have to find our own path in life, and we often wonder if we're making the right choices for our children. I know with 100% certainty is school has changed their lives for the better. Who knows what the future might hold, but they will be far better equipped to meet it for having been students at The Epiphany School.
